Joan LeBlanc, Executive Director

The Saugus River Watershed Council is a non-profit organization founded in 1991 to protect and restore the natural resources of the Saugus River watershed. Each year, we work with volunteers, local communities, and environmental agencies to protect and restore natural resources, provide quality environmental education programs, and expand public awareness of the watershed. Our 2008 priorities include improving water quality conditions, promoting restoration of fish habitat, educating local youths about environmental stewardship, and protecting key resource areas such as Rumney Marsh and Reedy Meadow.
